

Novopro TSCRIM6ftW & TSCRIM4ftW Table Scrim White

The Novopro Table scrims stretch around standard sized tables, setup in minutes and give you a professional finish at your venue.

Available in 4ft and 6ft sizes and either black or white finishes, the Novopro TSCRIM's will solve your table scrim requirements.

Manufactured from a double stitched elasticated material that allows the scrim to stretch around the table, they create a material finish that can either be used to blackout or be illuminated for some creative effects.

The TSCRIM4ftW (white) and TSCRIM4ftB (black) are designed to fit a standard 4ft table of 122cm wide, 70/75cm high and 61cm deep - however, due to the elasticated nature of the fabric, tables of slightly differing sizes will also be accommodated.

The TSCRIM6ftW (white) and TSCRIM6ftB (black) are designed to fit a standard 6ft table of 180cm wide, 70/75cm high and 76cm deep - however, due to the elasticated nature of the fabric, tables of slightly differing sizes will also be accommodated.

Convenient cable access points on the front edge of the scrim (two fitted points on the 4ft scrim and three fitted points on the 6ft scrim) and stitched-in pockets that fit around and under the table legs to secure the scrim into place. The shaped rear panel allows convenient access underneath the table.

Novopro TSCRIM ranges are treated with a fire retardant finish (which must be re-applied after hand or machine washing) and come with a convenient drawstring carry bag.
